

Focusing on My career development and to develop my skills for the organization's growth.

A highly resourceful, innovative and competent PHP & Frontend Developer with extensive experience in the layout, design and coding of websites specifically in PHP format.

Possessing considerable knowledge of the development of web applications and scripting using scripts using PHP programming language and MySQL databases.

Experienced in developing applications and solutions for a wide range of corporate, charity and public sector clients and having the enthusiasm and ambition to complete projects to the highest standard.

As a Developer !

I Have around 9+ years of experience in web development using PHP with different types of projects. I have worked on different types of CMS and frameworks like **Drupal (6,7&8)**, **Magento(1,2)**, **Wordpress**, **HTML5**, **CSS3**, **Jquery**, **GA** (Google Analytics), **GTM** (Google Tag Manager) and **React**.

Strong knowledge on Magento-1 e-commerce customize module and theme. few modules and customized core functions as per requirement. I have developed a Magento loyalty module for the leading online shop [William Penn](#) & [Murad](#).

- Excellent knowledge in php, Magento and debugging skills.
- Quick learner and ability to learn new concepts.
- Excellent knowledge of developing web services and relational databases
- Experience in common third-party API's. Rest API development for apps.
- Familiar with web development and content management systems.

Drupal

I have developed 10+ themes from PSD to HTML Drupal(7) and One ecommerce website development.

Wordpress:

My first project was [Eat water](#) woo-commerce website with custom layout and Blog for diet recipes and healthy foods recipes, e-books and user threads Our team developed within a week of days completed.

[Doubleddeer](#) - after Evo magazine and [Verxtech](#) it was my first solo project in Raisinglbrows office(Madebyfire).

Codeigniter:

[Fertility Dost](#) - Online Dr consultation, events and yoga class. Created this project theme and development from scratch.

Frontend Development:

Strong knowledge on HTML & CSS, Js & JQuery. Developed Murad quiz function fully worked in jQuery customized functions with help of local storage concepts. Murad Quiz has 15 questions and multiple answers so when page load time we need to get all questions & answers and final result and stored in single Json format, And js based needs to design and based on answer need to select next question all logic controlled by JQuery.

- Excellent skill in jQuery and debug JavaScript errors. Fixing version conflict in jQuery.

Amazon web service: Familiar with the S3 Services and Auto scaling. Version control using SVN simple repository and Git-hub repository.

GA & GTM:

Have strong knowledge on GTM (Google Tag Manager), Tracking site events like click, add to cart, email-subscribe, page view.

- Excellent knowledge in GTM tags, Triggers, Events and variables.
- Created custom tags with JQuery function,
- GTM version controller and Debugging GTM issue.

EDUCATIONAL QUALIFICATION

1. **B.E (CSE)** - Jayam college of engineering, Dharmapuri (2006-2010) - **68.00%**.
2. **HSC** - Saratha matriculation school, gobi (2006) - **71.00%**.
3. **SSLC** - Ideal higher secondary school, anthiyur (2004) - **84%**.

Project: Balfour

(<https://www.balfour.com/>, <https://www.artcarved.com/>)

Technology: PHP 7.1, Mysql, Netsurf, s3 bucket, Dell Bhoomi

Role: Developer.

Description: Balfour, founded in 1913, is well known for its long and successful history of the manufacturing, sales and marketing of class rings, yearbooks, letter jackets and graduation regalia to middle school, high school and college students and alumni.

This project has several modules and the following modules are working.

- Yearbook & graduation product (Magento Bundle items).

- GA & GTM Implementation and created New Tags, Triggers and Events.
- CSV export orders, Products attributes to S3 bucket based on jenkins job config.
- Every 6 Hrs school based products price & special price update.
- Neturt & npm order exports and add a few custom attributes.

Project: Murad

(<http://murad.com>, <http://murad.co.uk>, <http://murad.com.my>, <http://murad.com.au>)

Technology: PHP 5, Mysql, Magento, jQuery, HTML5

Framework/CMS: Magento EE (1.4) and API.

Role: Developer & Ui

Description: Murad is the world's leading clinical skincare brand. Murad quiz module developed for this site, to select perfect products.

Dynamic quiz and created a new module skeleton with csv file import for mapping question, answer and result bundle products.

Some of the important features included in the project.

Murad.com - Murad Dynamic quiz application, Auto-renewal orders for 30,60 and 90 days pack products. Oracle order Management, Cron API based orders export to shipping, Failed order export email reports to admin. Blog to Magento addtocart.

Murad UK - Murad Dynamic quiz, Auto-renewal orders, It was one of the biggest challenges for me to handle the project, this was expected to launch in the time frame of 2 months. Magento EE 1.10 to Magento CE 1.9 version. Our team moved all customer orders transferred to the new site.

Murad My & AU - Malaysia & Australia sites are multi-site concepts so my skill and understanding of the project created child themes for Single setup with 4 site themes (Malaysia, Australia, Mexico and Germany). Multi-site based splitted all products, stocks, Admin, Order Management CMS page contents.

Project: Happybelly Bakes

(<https://www.happybellybakes.com/>)

Technology: PHP 5, Mysql, jquery, Bootstrap, html5

Framework/CMS: Magento CE (1.4)

Role: Developer & Ui theme development

Description: Bangalore based cake shop - Online order and customized photo cakes and cookies sale. Created a new custom module for zip code & weight based shipping cost calculations only in bangalore.

Project: William penn

(<https://www.willampenn.net/>)

Technology: PHP 5, Mysql, jquery, Bootstrap, html5

Framework/CMS: Magento CE (1.4)

Role: Developer & Ui theme development

Description: I created a custom pen engraving option in PDP, with dynamic fonts. limited letters and update in cart page, checkout page adding cost for custom options and finally update in admin order. Infinity stock management for luxury Penns like stock goes out of stock. Magento will update qty 1 to that product and send email notifications.

Project: MerchSource

([SharperTomorrow](#))

Technology: PHP 7, Mysql, jquery, html5

Framework/CMS: Wordpress 5.0

Role: Developer & Ui

Description: (MerchSource) US based multi-department retail, Ideates, designs, sources and distributes consumer products to the nation's largest retailers. I have developed this project from scratch. Few face few challenges in this project in project image and dynamic layouts.

Project: Etwater

(<https://www.wetwater.co.uk/>)

Technology: PHP 5, Mysql, jquery, html5

Framework/CMS: Wordpress 4.2

Role: Developer & Ui

Description: UK based a safe weight-loss ingredient. Complete website development and development support. Every 15 days they will change offers like BOGO, BOGH, 15% off so each time we need to change banners, contents & price so I created a custom function and created wp-config and applied to all products based on category applied offers & html contents.

Project: Prince Jewellery

(<https://www.princejewellery.com/>)

Technology: PHP 5, Mysql, jquery, html5

Framework/CMS: Magento

Role: Theme Development.

Description: 1 Month project so our team split the tasks and completed the full project in 15 days. Frontend works on UI & Theme implementation.

Project: EVO India

(<https://www.evoindia.com/>)

Technology: PHP 5, Mysql, jquery, html5

Framework/CMS : Wordpress

Role: Theme Development.

Description: This project timeline is 1 week. so we developed a full site we completed on time.

Project: Double Deer

(<https://www.doubleddeer.co.in/>)

Technology: PHP 5, Mysql, jquery, html5

Framework/CMS: Wordpress

Role: Complete website development

Description: My self developed a full site within the 5 Days.
